DISASTER MANAGEMENT CONTINUUM

Source: DSWD

The Citizens Disaster Response Network in the Philippines has been promoting a citizenry-based Development-oriented disaster management since 1984. It uses an alternative framework to the disaster management continuum which gives an impression of a sequential flow of activities. It categorizes DM interventions simply as pre-, during and post-disaster responses which are done within the overall framework of development.

PRE

***Mitigation
Preparedness***

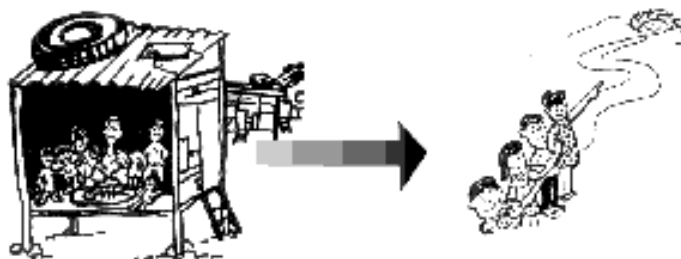

DURING

Emergency Responses

POST

***Rehabilitation
Mitigation***

WITHIN THE FRAMEWORK OF PEOPLE- CENTERED AND SUSTAINABLE DEVELOPMENT
